VERIGATE-100 Firewall

Secure your network
Protect your privacy

In today's connected world, your home network and small business data are constantly under threat from cyber criminals, trackers, and malware. A standard internet router simply isn't enough to keep the bad actors out.

Why Choose for VERIGATE-100 ?

Network Security

Stop threats before they ever reach your devices.

The VERIGATE-100 continuously scans incoming and outgoing traffic, blocking hackers, malware, ransomware, and phishing attempts in real time.

- **Smart Filtering:** Keep your family safe or your employees productive with customizable content and website blocking.
- **Intrusion Prevention:** Advanced detection algorithms shut down unauthorized access attempts instantly.

Total Privacy with Built-In VPN

Take control of your data. With dedicated, hardware-accelerated Virtual Private Network (VPN) capabilities, you can encrypt your entire internet connection.

- **Secure Remote Work:** Employees can safely access the office network from anywhere in the world.
- **Privacy at Home:** Mask your online activity from Internet Service Providers (ISPs) and data brokers across all connected devices simultaneously.

Easy Installation

You don't need an IT degree to secure your network. Do it yourself or ask our Support Team for assistance.

Service & Support

Warranty: 2-Year on hardware.

Support: by email, phone*

On-Site Assistance*: For complex setups or critical issues, we can send a technician straight to your home or business.

* There are extra charges for these services.
